## PROFESSIONAL SUMMARY

Full-stack engineer with 2+ years building and operating production multi-tenant SaaS platforms end to end — from database schema and role-based access control to Linux VPS deployment and CI/CD. Ship features across Next.js, NestJS and PostgreSQL, and own the release pipeline (Linux, Nginx, GitHub Actions, SSL/DNS). Recently delivered a third-party ATS (Indeed) integration involving GraphQL sync, retry/backoff and audit logging. Focused on reliable, observable deployments and clean, scalable architecture.

## CORE SKILLS

**Languages:** TypeScript, JavaScript, SQL, Bash

**Frontend:** Next.js (App Router), React, Redux Toolkit, Zustand, Tailwind CSS

**Backend:** Node.js, NestJS, Express, REST, GraphQL, JWT / RBAC auth, Prisma, Drizzle

**Databases:** PostgreSQL, Supabase, MongoDB, Firebase; multi-tenant design, RLS, query optimization

**DevOps & Infra:** Docker, GitHub Actions (CI/CD), Linux (Ubuntu) administration, Nginx, VPS deployment, SSL/TLS, DNS, PM2

**Cloud & Tools:** Vercel, Railway, Netlify, Cloudinary, Git / GitHub / GitLab, Postman

**Practices:** Multi-tenancy & tenant isolation, RBAC, third-party API integration, audit logging, Turborepo monorepo

## EXPERIENCE

### Full-Stack Engineer — Cure Logics, Rahim Yar Khan (PK) | Oct 2024 – Present

- Build and maintain **Veylohr**, a multi-tenant HR management SaaS used by companies in Italy (employee management, attendance and role-based workflows) on Next.js + NestJS + PostgreSQL.
- Designed tenant isolation and role-based access control (RBAC) across the platform, keeping each company's data segregated within a shared database.
- Delivered a full **Indeed ATS integration**: job publishing, GraphQL-based disposition sync, exponential-backoff retries, duplicate-detection windows and audit logging — resolving crawler / SSR / SEO blockers that had failed partner review.
- Own deployment to a **Linux VPS** behind **Nginx** with SSL, environment management and automated **CI/CD via GitHub Actions**.
- Built a 107-item Italian province-code mapping utility to correct faulty geo data from a third-party library.

### Full-Stack / Freelance Developer — Upwork & Fiverr | 2023 – 2024

- Delivered 30+ client projects across e-commerce, real estate and real-time collaborative editing (Next.js, NestJS, Supabase, Tiptap / Hocuspocus), deployed on Vercel, Railway and Netlify.
- Grew repeat clients through on-time delivery and clear communication in English.

## KEY PROJECTS

**Veylohr — Multi-tenant HR SaaS.** Next.js, NestJS, PostgreSQL / Prisma, Supabase, RBAC, Indeed ATS integration; deployed on VPS with Nginx + GitHub Actions CI/CD.

**Curantis — Hospital Management SaaS.** Turborepo monorepo (Next.js, Prisma, Supabase) spanning 32 modules with a modular, multi-color design system.

**Real-time Collaborative Editor.** Live multi-user editing with Tiptap, Hocuspocus and Liveblocks (NestJS backend, Next.js frontend).

## EDUCATION

**B.Sc. Computer Science** — National College of Business Administration & Economics | 2022 – 2026
